WEB ACCESSIBILITY & COMPLIANCE MADE EASY

An accessible website drives discoverability and customer engagement, while reducing legal compliance risk, brand risk, and a poor user experience.
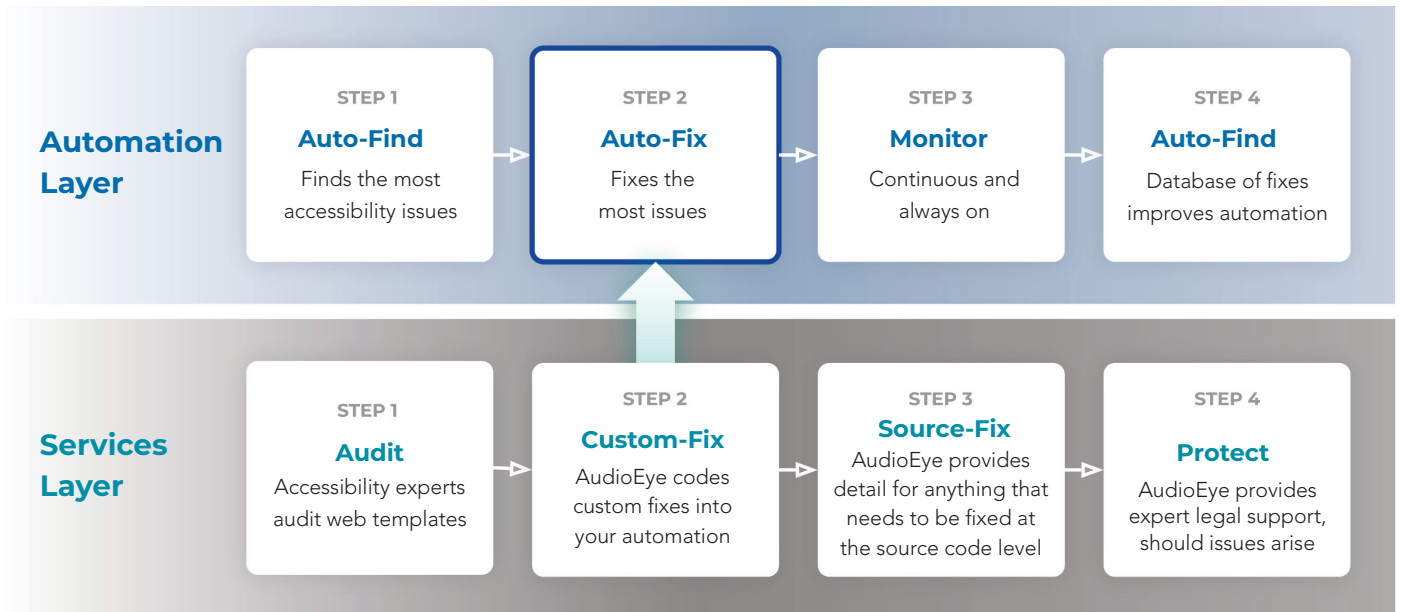

AudioEye is the only solution that provides accessible and compliant websites at a fraction of the cost of testing platforms and consulting services:

- Providing industry-leading automated fixes built right in

- U.S.-based in-house accessibility experts audit your content and build custom fixes for you

- Active Monitoring finds issues and fixes content in real time for every user

HOW AUDIOEYE WORKS

Automation finds and fixes the majority of common issues, leaving much less work for accessibility experts. Enabled by the platform, AudioEye's team of experts will build custom fixes or guide on source fixes.

Automation Layer

STEP 1	STEP 2	STEP 3	STEP 4
Auto-Find	**Auto-Fix**	**Monitor**	**Auto-Find**
Finds the most accessibility issues	Fixes the most issues	Continuous and always on	Database of fixes improves automation

Services Layer

STEP 1	STEP 2	STEP 3	STEP 4
Audit	**Custom-Fix**	**Source-Fix**	**Protect**
Accessibility experts audit web templates	AudioEye codes custom fixes into your automation	AudioEye provides detail for anything that needs to be fixed at the source code level	AudioEye provides expert legal support, should issues arise

AudioEye Solution Includes:

- **Site Audits by Accessibility Experts:** While our technology finds and resolves most issues, some critical issues can only be found by experts.

- **Compliance Plan for ADA, Sec 508, AODA & more:** A full WCAG-based compliance plan provides necessary compliance documentation.

- **Automated Tests & Fixes:** Software-enabled tests and fixes automatically run on a website when a user visits a webpage.

- **Access to Certified Accessibility Experts:** Access to IAAP-certified accessibility experts to conduct additional website audit with assistive technology and order custom fixes that are not ' resolved through automation.

- **Visual Toolkit with 24/7 Help Desk**: Personalization toolkit available on customer websites by toggling the floating accessibility icon. Users can submit feedback through a Help Desk if they encounter access barriers on a website.
